

Corporate Presentation

Corporate Info

- Founded by consultants who have more than a decade of experience in engineering and delivering challenging enterprise solutions across various verticals.
- We Design & Implement best in class enterprise wide solutions specializing in Oracle ERP
- Founded by professionals with domain and ERP experience in delivering successful implementations.
- Serving with commitment to Customer satisfaction, Quality and Accountability

The SPHERE Difference

Strong Domain Exposure

The consulting team at Sphere have a huge collective domain knowledge covering areas like Finance, Procurement, Customer Management, Human Resource Management etc. This helps us in effective mapping of different business scenarios.

Focus to understand Client Business case

Sphere strongly believes that any project can be successfully delivered if the requirements are understood the way the customer understands. We abide this by allocating strong Business Analysts in the beginning of the project life cycle.

Successful Track Record

Sphere enjoyed a high rate of successful implementations primarily due to our stringent policy to deploy highly suitable consultants to work on specific project implementation.

Sphere Service Spectrum
